It does appear that way. Remember that these layers are devolved with remote sensing. If you are really concerned about encroachment a wetlands survey would need to be completed to identify the boundary in the field. I'm assuming that the state has been looking at what we are doing. Did anybody from the state bring it up?

Am I reading that right or does it look like the Wetlands are just on the outskirts of area of interest?

Hi Eric,
Quick and dirty map, I can put together a more formal GIS map in the morning.
[image1.PNG]

It looks like we will be working just outside of the wetlands. I don't have my computer with me right now but, as stated above, I will drop this layer on our maps and see where it lines up.

Hi Peter:

Do we have Wetlands identified at NFB Site? I thought you looked into that but cannot find. Thanks

Regards,

Eric
